In 1991, we made Denmark the home of the world's
 first-ever offshore wind farm, and today, we've
 transitioned almost entirely away from fossil fuels to
 renewable energy. In doing so, we've not only
 dramatically reduced Denmark's carbon emissions
 ??? we've also given the world a new sustainable
 power source and brought it to maturity

The politically approved energy islands (hubs) in the North Sea and the Baltic Sea will be the world's first energy islands and are a cornerstone of Denmark's ambition to meet its climate goals. At the same time, renewable energy on Danish territory will supply Europe with green electricity.

An agreement has now been reached between the parties involved in a large-scale CO2 storage project aimed at securing carbon storage in the North Sea. With the final investment decision, INEOS Energy, Harbour Energy, and the Danish North Sea Fund can now announce that, as the first in the EU, they will begin storing CO2 underground in the North Sea ???
