Power Production. While solar is fairly easy to gauge how much you will produce over time, wind is much harder. The rating on a wind turbine is at a set speed, so a 2.5kW turbine might only put out 2.5kW at a 27mph wind. At an 8mph wind it may not produce anything and at a 12 mph wind it may only produce 0.5kW.

Why Solar Power is Ideal for Michigan Homes.

Solar power represents a smart, future-proof investment for Michigan homeowners, offering benefits that go beyond simple energy production. One of the most compelling reasons to embrace solar power for Michigan homes is its ability to provide protection against the rising costs of energy.
