

FortisTCI, the energy provider in the Turks and Caicos Islands, is making significant strides in constructing the country's first utility-scale solar plus battery microgrid on its property in Kew, North Caicos. The project began last year and has reached a critical milestone, with installation of the solar PV system now underway.

Construction on the twin-islands project will commence this year, and the system will come on stream in 2024. The solar plus battery microgrid on Salt Cay will also be operational in 2024. Both microgrids will encompass a battery energy storage connected to the primary grid with the ability to disconnect and operate independently, as necessary.

Through our partner Solar Island Energy we provide in the Turks and Caicos Islands renewable energy solutions from houses to micro-grid systems. Enecom thin film solar panels provide just ???

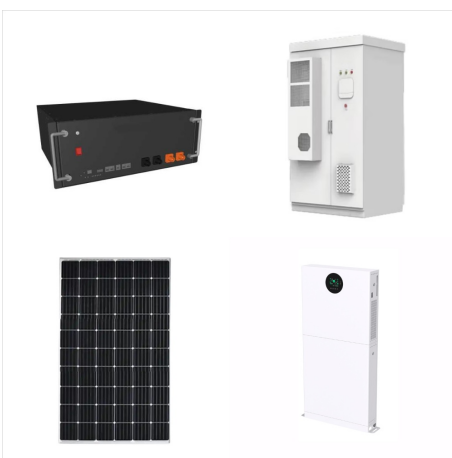

MICRO ENERGY STORAGE FACILITY TURKS AND CAICOS ISLANDS

renu energy TCI is your certified installer in Turks and Caicos Islands to design, install and maintain Tesla's energy storage solutions. Rely on the best in class solution to provide you clean power from your solar system and provide resilience when the grid goes down.

Providenciales, Turks and Caicos Islands (Thursday, June 8, 2023) - FortisTCI will invest \$8 million to install the country's first solar plus battery microgrids to power 30% of the electricity supply on North and Middle Caicos and 91% of the electricity supply on Salt Cay in 2024. The microgrids represent the Company's single largest green

Both islands receive electricity via an undersea cable from Providenciales, and a battery energy storage system will help to reduce grid disruptions and strengthen redundancy. The twin islands microgrid is the company's largest green energy investment to date.
