 LIFEPO4 ???

Simply put, a grid-tie inverter converts direct current
 (DC) into alternating current (AC) suitable for
 injecting into an electrical power grid, normally 120
 V RMS at 60 Hz or 240 V RMS at 50 Hz. Grid-tie
 inverters are used between local electrical power
 generators: solar panels, wind turbines,
 hydroelectric, and the grid.

MICRO INVERTER GRID TIE WITH BATTERY BACKUP SRI LANKA

There are mainly three types of solar inverters ??? string inverters, micro-inverters, and power optimizers. All these inverters have a different system. However, they have the same function, which is collecting DC power from batteries and convert into AC, though with different levels of ???

W MPPT Micro Inverter,Solar Grid Tie Microinverter,WiFi Control,Self Cooling,120/230V Solar Energy Converter,Waterproof IP65 for Roof Outdoor,Solar Power Generation Equipment online at a best price in Sri Lanka.

I'm writing this from Colombo, Sri Lanka, where as some of you may know, we are experiencing long power cuts (8-13 hours) due to an almost exact repeat of the Lebanese fiasco. As a result, I'm urgently trying to assemble a power-wall + hybrid inverter solution for backup power, as I already have 6.8KW of solar panels.
