A hybrid solar and battery project in Antigua and Barbuda, funded by the \$50 million UAE-Caribbean Renewable Energy Fund, features 720 kWp of solar panels and an 863 kWh battery, designed to

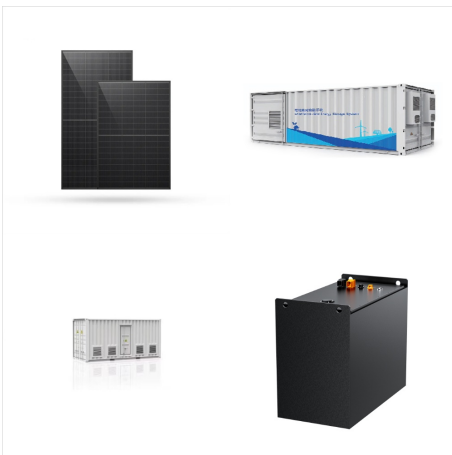

Customers who have systems in excess of 5KW will be governed under the "Buy all, sell all" net billing system. The Customer pays the Utility, at the published tariff rate, for all of the power consumed. The energy produced by the renewable energy system is then credited to the customer at the avoided fuel cost.

ANTIGUA BARBUDA 3 Antigua and Barbuda is a small island state with no known indigenous fossil resources for energy supply; the country imports 100% of petroleum products to meet its energy demands. This dependence on fossil fuels exposes our nation to external shocks and the volatility of the petroleum fuel market. Rising energy

What is a Microinverter? A Microinverter or a Solar micro-inverter is an extremely small device used to convert DC to AC. These inverters are so small that they are used as plug-and-play. Microinverters work remotely with every panel. This is advantageous in case of panel failure or power surge. These inverters work on every power output from the panels and if there are ???
