

What is a Microtek online UPS 5KVA?

The Microtek Online UPS 5KVA is engineered for energy efficiency. The double-conversion technology minimizes energy losses and ensures optimal use of power. Additionally, the UPS regulates voltage, reducing the risk of damage to connected equipment and potentially lowering maintenance costs.

Why is a UPS battery backup important?

It's not just a glorified power bank, because the UPS detects interruptions in the power and automatically switches the connected devices to running off the UPS battery, so they don't shut down. This makes a UPS battery backup especially valuable for computers, preventing work from being lost or files from being corrupted by an improper shut-down.

What is a standby UPS computer backup system?

A standby UPS computer backup system uses a little power to keep its battery charged (and to power a display if equipped with one), otherwise there is really no additional power draw compared to plugging your PC directly into a wall outlet.

What is a consumer-grade UPS backup device?

Consumer-grade UPS backup devices are typically classified as "standby UPS power." This means the UPS plugs into an electrical outlet, using power to keep its backup battery constantly charged. It also supplies a PC or other electronic devices plugged into the UPS with AC power via that wall outlet.

What is the warranty on the up625?

During power interruptions, the UP625 offers reliable power protection and battery backup. The UP625 comes with a three-year warranty and a \$50,000 Connected Equipment Guarantee. Supplies power long enough for equipment to properly shut down when utility power fails.

Is UPS battery backup safe?

UPS battery backup is a safeguard to protect your PC and electronics. You must use the same precautions as you would with any battery--protect it from temperature extremes or being hit with heavy objects--but choose a UPS power supply from a reputable company and it will be certified to meet all relevant Canadian safety
