Energy is essential for our day-to-day living and powers our economy. Our energy consumption has risen as our nation develops and population grows. We must ensure that this precious resource is used wisely, to strengthen energy security and reduce our environmental impact. Improving energy efficiency may not require drastic changes in lifestyle.

(NGTP) i.e. energy, environment, economy and social. This first edition of the GTMP focuses on six key sectors, namely Energy, Manufacturing, Transportation, Building, Waste and Water and attempts to harmonise the policy directions of each sector towards a common goal of sustainable utilisation of natural resources.
