

Kosovo's first solar auction for the construction of a 100 MW solar plant in the town of Rahovec attracted six bids, as revealed earlier this week. The plant will be built on public land and

The compact program for a grant to Kosovo\*, estimated at USD 234 million, consists of two projects: batteries with an installed capacity of 200 MWh, and the development of the workforce and involvement of women in the energy sector, the Ministry of Economy said.

The Energy Storage Project, also known as BESS, is one of the pillars of the \$236 million MCC-Kosovo Compact Program. The project will introduce a state-of-the-art battery storage system and entails the largest energy investment in Kosovo during the last few decades.

Installing a 340 MWh battery storage facility in Kosovo will positively impact the country's energy sector by reducing the country's dependence on imported electricity, including increased

The MCC-Kosovo Compact seeks to introduce a state-of-the-art energy storage system, laying the foundation for reliable, renewable energy sources to be integrated into Kosovo's grid and reducing the need for coal-generated power and costly energy imports.

The discussions focused on the progress of the Battery Energy Storage System (BESS) dedicated for the Kosovan Transmission System and Market Operator (KOSTT) under the FRR activity, as well as the BESS for newly established Energy Storage Corporation of Kosovo (ESCorp) under the MFES activity.
