Renewable Energy: Global problems require global solutions. Modern Marvels: Renewable Energy, a one-hour History Channel documentary, shows how the combined forces of wind, solar, geothermal, biomass, wave and tidal power are ready to move the world beyond oil, coal and other 19th Century technologies.

The power sector generates the electricity that sustains modern life -- but it's also the number one contributor to climate change. We need a swift and equitable shift to renewable energy, says 2023 Audacious Project grantee and ReNew2030 executive director Rebecca Collyer. In conversation with TED's David Biello, she introduces a new coalition of governments, businesses and ???

The article explores the issue of renewable energy storage for excess solar and wind power. A challenge facing renewable energy production is the erratic generation of energy relative to electricity supply and demand, making it difficult for wind and solar power plants to compete economically with traditional power utilities. Modern Marvels
