In Moldova saci menajeri biodegradabili la comanda sunt fabricate si indeplinesc numai cu cerintele stricte ale standardului european EN 13432. Acesta prevede ca in conditii controlate descompunerea biologica are loc in 12 saptamani, iar in centre de compostare comerciala a deseurilor, degradarea materialului edureaza de la trei pina la sase luni.

The Energybox is powered by a GreenPack battery. You can either charge it in Advance at home or you stay flexible and use the Swobbee infrastructure for you. There you can easily exchange your empty GreenPack battery for a full one. All you need is 30 seconds to do it. Do you know Swobbee? You can contact us directly for more information.

The GreenPack(R) idea involved charging one battery while using another and then exchanging them when the battery in use ran down. To realize the concept the company needed robust materials that could, first, safely house the lithium-ion cells in a material that minimized the fire risk and, second, withstand the significant wear and tear that would result as users repeatedly a?]

GreenPack(R) GmbH pioneered their replaceable battery system to encourage faster and wider adoption of rechargeable batteries for diverse devices. The system is designed to make safe and easy replacement possible by packaging and housing batteries in two flame-retardant grades of Bayblend(R) resin.

The hot-swappable GreenPack battery will be deployable in e-fleets for car sharing and delivery services as well as in commercial transport. It can also be used to power lawn mowers, snow blowers, and weed trimmers. a?|

GreenPack(R) GmbH pioneered their replaceable battery system to encourage faster and wider adoption of rechargeable batteries for diverse devices. The system is designed to make safe and easy replacement possible by packaging and housing batteries in two flame-retardant grades of Bayblend(R) resin.

The three GreenPack lithium-ion batteries at the bow provided the engine with sufficient energy for the 30-km-long route. The GreenPack batteries attracted a lot of interest from spectators and boat owners. Due to the modular approach, the GreenPack rechargeable battery is an ideal partner for electric mobility on the water or on land.

The aim of this collaboration is to design the lithium-ion battery of the next generation, Ansmann's "GreenPack", enabling the advantages of polypropylene (PP) usage. The new generation of a?]
