

What energy sources are available in Mozambique?

Mozambique has abundant energy sources available for exploitation. As of 2021, the country was ranked first in energy potential of all the countries in the Southern African Power Pool (SAPP), with an estimated energy capacity of 187,000 MW. Available energy sources include coal, hydroelectricity, natural gas, solar energy and wind power.

How much power does Mozambique have?

As of 2019, Mozambique had 2,185 MW of installed hydroelectric generation capacity, accounting for 92 percent of total national installed capacity of 2,375 MW. The 2,075 megawatts Cahora Bassa Hydroelectric Power Station (CBHPS) across the Zambezi River, is the largest power station in Mozambique.

What is the largest power station in Mozambique?

The 2,075 megawatts Cahora Bassa Hydroelectric Power Station (CBHPS) across the Zambezi River, is the largest power station in Mozambique. The power station is operated by Hidroelectrica de Cahora Bassa (HCB), a Mozambican parastatal company.

How many hydropower stations are there in Mozambique?

There are over 3,400 megawatts of hydropower stations in the pipeline in Mozambique, the majority planned across the Zambezi River, including the 1,500 megawatts Mphanda Nkuwa Hydroelectric Power Station and the proposed 1,245 megawatts extension to the CBHPS.

How much natural gas does Mozambique have?

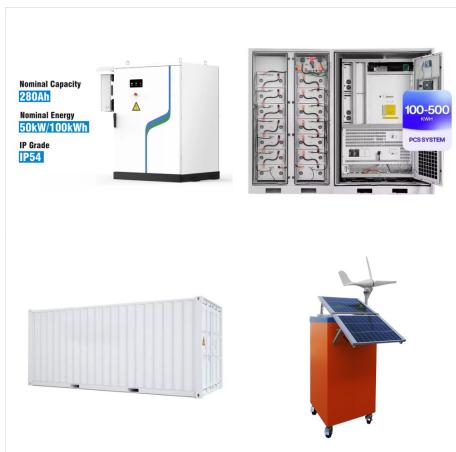

Mozambique has proven natural gas reserves in excess of 180 trillion cubic feet. In the north of the country, AREA1 is under concession to TotalEnergies. AREA4 is concessioned to ENI and ExxonMobil.

Is Mozambique a grid-ready country?

In September 2020, EleQtra, an American IPP, began construction of the 120 megawatts Namaacha Wind Power Station, in Maputo Province, the first grid-ready wind farm in Mozambique. Completion is anticipated in 2023. Mozambique has proven natural gas reserves in excess of 180 trillion cubic feet.
