Task 1: Verify the management IP address of the HPE MSA storage systems This eLearning course provides in-depth knowledge about HPE MSA storage virtualization capabilities and equips storage administrators with the tools they need to optimize management, implementation, monitoring, and maintenance functions on the HPE MSA sto rage solution.

This summer HPE made several portfolio updates including the release of the fifth generation MSA platforms consisting of the MSA 2050 and MSA 2052 entry-level SAN arrays. Starting at under $10,000, the new MSA systems deliver a deep set of well-proven features (500,000 systems sold), along with reliability and ease of use that MSA has long been known for.

MSA-DP+ is a RAID-based data protection level that has been newly introduced with 6th Gen MSA Storage systems. It maximises flexibility and delivers built-in spare capacity. Performance is optimised with the elimination of idle spares. MSA-DP+ enables for quick rebuilds, large storage pools and easy expansion. Enhanced Simplicity

MSA STORAGE SYSTEM

Get the right storage, just when you need it. Tackle your data storage challenges with a simple, fast, and amazingly affordable HPE MSA system. Integrated with today's most widely used hypervisors and operating systems, HPE MSA Gen6 enables you to power your workloads even as you work to lower costs.

The HPE MSA 2062 Storage is a flash-enabled system designed for affordable application acceleration for small and remote office deployments. Don''t let the low cost fool you. The HPE MSA 2062 gives you the combination of simplicity, flexibility and advanced features you may not expect in an entry-priced storage array.
