The MSES cohort is comprised of early- and mid-career professionals who seek the knowledge and credentials to pivot into, or accelerate their career within, energy and sustainability. They come from wide range of roles and industries, including consulting, finance, health/medicine, government, manufacturing, public utilities, transportation.

These planned energy exports would make the European and West African energy markets partially dependent on energy generated in occupied Western Sahara. The Saharawi people are 500,000: around 30-40,000 live under the Moroccan military occupation and the rest live in the Tindouf refugee camp (the capital of the exiled SADR) in Algeria and some

More than eight years have passed since Siemens first issued a press release regarding a contract for construction of energy infrastructure in occupied Western Sahara. The company then described the territory as "Southern Morocco". Now, it has done that again. In a press release [or download] of early September, Siemens Gamesa Renewable Energy (SGRE) announced that ???

" Morocco to Double West Sahara Green Power Output for World Cup", 16 October 2024 The government has set a 2027 deadline to build 1.4 gigawatts of new wind and solar capacity in the region The projects are likely to cost about 21 billion dirhams (\$2.1 billion) and will be led by local and foreign private investors, according to the official

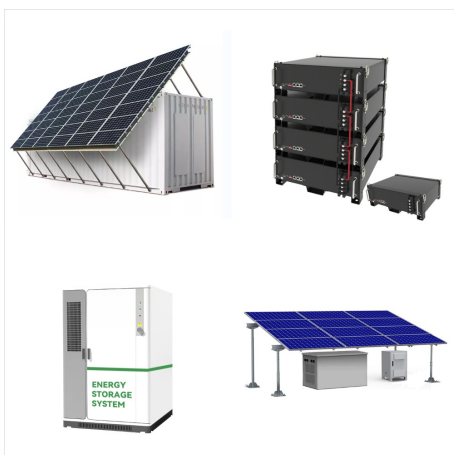

Morocco drives renewable energy projects in Western Sahara. Morocco has claimed authority over Western Sahara since 1975, but the UN does not recognise Moroccan control, calling Western Sahara a "non-self-governing territory." The UN has called for a referendum to decide the region's future.

Katie O'Shea. Katie O'Shea joined the Master of Science in Energy and Sustainability (MSES) program to learn to create strategic solutions for companies transitioning from fossil to sustainable energy. She previously worked in global project management as a project engineer in the oil and gas industry and joined the MSES program to pivot her career.

" Morocco to Double West Sahara Green Power Output for World Cup", 16 October 2024 The government has set a 2027 deadline to build 1.4 gigawatts of new wind and solar capacity in ???

Western Sahara Resource Watch, a Brussels-based NGO allied to the independence movement, estimates that by the end of the decade occupied Western Sahara could be supplying half of all Morocco's wind energy and a third of its solar energy, much of it headed for Europe. Morocco insists that the territory is part of Morocco.

To help students prepare for careers in their chosen industry, the MSES Program facilitates the formation of Career Interest Groups (CIGs). This is a career preparation model typically used in business schools where students work together to support each other's progress towards internships and full-time positions in energy and sustainability organizations.
