Hi solar_jon. We have the Libbi inverter in our garage. It does generate a little bit of a background hum, but nothing near the sound you are reporting. I suggest involving ME as that doesn't sound right to me, based on our experience with our Libbi.

The same applies to Libbi discharge, so depending on whether the Zappi or Eddi are above or below the Libbi will determine the priority of its discharge and charge. The Libbi manual will fill in the rest in more detail. You should expect a minor flow of energy to the grid, but it won't amount to a lot of energy.

De Myenergi Libbi werkt desgewenst nauw samen met de Myenergi Eddi en de Myenergi Zappi. Dit is de variant LIBBI-510Sh 5.00kW 10kWh, met twee batterijmodules. Zie de Gerelateerde producten voor de andere Libbi ???

myenergi has created a dedicated libbi support form to answer your questions efficiently. Complete the form below and we'll respond as quickly as possible. libbi Technical Enquiries. As libbi is a brand-new product to the market, and will often be retrofitted into numerous unique scenarios, some of the queries we receive may require some

MyEnergi created libbi to store your electricity, to use it when you need it most. It allows you to capture surplus solar electricity, whilst integrating with your existing myenergi devices. libbi is modular by design. Each battery module can store up to 5kWh of electricity, so combining 4 of them together would provide up to 20kWh of storage.

I've got cheap electricity between 23:30 and 05:30, so I've set that up in the myenergi app. I expected the libbi to be 100% charged (or close to) at the end of that period, however I'm seeing once the libbi is charged it doesn't stay charged even though electricity remains cheap : Okay, its not much (6% down), but still unexpected to me.

Following some initial feedback on problems with the new libbi feature to set the target State of Charge (SOC) when charging from the grid, we have up We've updated myenergi app - v3.2.3. chris.young. 249 80. chris.young. 249 80. Post Nov 01, 2023 #10 2023-11-01T08:52+00:00. Have you all ensured your app is the latest 3.2.3 rev 9 ? (on

libbi is designed to work in harmony with your other myenergi devices. Prioritize where stored electricity is diverted, for use in your home, to charge your car, or to heat your water heater. Whether you want to charge libbi via solar energy, the ???

Yes, myenergi app states 0.2KWh import between 0:00 and 7:00, but my supply meter shows 0.1KWh for the same period, so close enough to zero not to worry about. I can't get export data from my smart meter to do the same check unfortunately, but the myenergi app shows 0.4Kwh for 7 hours. With regard to the Libbi self consumption, 100w seems very

myenergi_Dr_Chris. 7,852 6,258. Post Mar 11, 2023 #2 2023-03-11T08:09+00:00. Libbi will launch with G100-1 G100-2 will follow once testing is complete (the new standard is complex) and the ENA have approved it. Libbi is a hybrid system. It can be used a standalone AC battery if you want, but comes with dual PV string inverters.
