GAF Energy announced the release of a solar roof system incorporating nailable shingles. and design-minded to homeowners across the country," said company President Martin DeBono. The shingles will be assembled at the company's 112,000 sq. foot facility in San Jose, California. GAF moved its manufacturing there from South Korea last year.

Spotted: Aside from cost, one of the biggest factors slowing the uptake of solar panels is the way the panels look. Realising this, several manufacturers have developed photovoltaic roof tiles ??? solar tiles that can look like standard tiles. However, GAF Energy is the first to develop solar tiles that can also be installed the same way as their non-solar counterparts.
