Nanogrid and microgrid owners also can save money if they use energy from their systems, instead of the grid, during times when grid power is expensive. Another important benefit of nanogrids is their interconnectivity to a larger scale smart grid. An aggregated network of nanogrids can be very valuable to the grid.

Schneider Electric Global. ELECTRON aims to provide a new-generation EPES platform that enhances the resilience of energy systems to cyber, privacy and data attacks through four pillars (risks, anomalies, failures and restoration and AR-VR-based threat treatment) promoting the certification of cyber protection.
