Nepal's solar equipment supply capacity. Why Are Lithium-Ion Batteries Better for Solar Products than Lead-Acid Batteries? The lead-acid battery is the oldest rechargeable battery in existence, and it also costs less upfront. However, despite that advantage, lead-acid batteries require regular maintenance and don't last as long.

Lithium-ion batteries have a much lower environmental impact compared to lead-acid batteries, which contain hazardous materials like lead and sulfuric acid. The transition to lithium-ion batteries aligns with Nepal's commitment to a greener and more sustainable future. Why Transition to Lithium-Ion Batteries Makes Sense for Nepal. Energy Efficiency
