However, that doesn't stop us from matching our non-renewable energy with renewable energy products nearby. We purchase renewable energy certificates to match our non-renewable energy use and fund renewable energy production from sources like wind and solar. The projects we support generate renewable energy in locations where we have a direct

The Shift Project analysis overestimates the energy intensity of data centres and content delivery networks (CDNs) that serve streaming video to consumers by around 35-fold, relative to figures derived from 2019 Netflix electricity consumption data and subscriber usage data.. My updated analysis shows the Shift Project also overestimates the energy intensity of a?

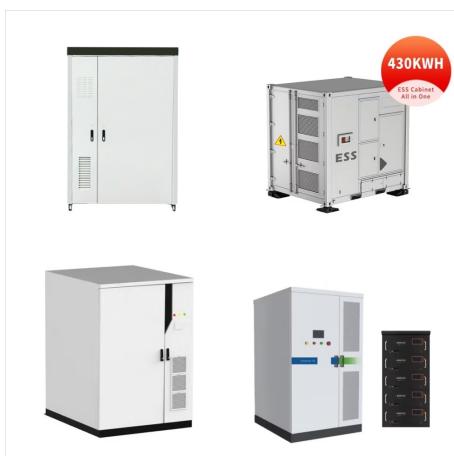

This is because data center, internet, and utilities providers can take on more demand without consuming more energy. They're continually updating their equipment to be more energy efficient, as well as buying and using more renewable electricity. The white paper looks at past trends to break this down.

In honor of Earth Day, a documentary on potential of solar energy debuts tonight on Netflix, "Catching the Sun." Produced by Leonardo DiCaprio, the film shows how solar can address both climate change and income inequality, and how people can take power generation into their own hands. And it offers a glimpse into the future of energy.

As the world grapples with the escalating realities of climate change, the power of cinema has emerged as a vital tool for raising awareness and inspiring action. Netflix, with its vast repository of films, offers a treasure trove of compelling narratives that look into the complexities of our ongoing environmental crisis. From gripping documentaries that [a?] [

This includes having nearly 100 per cent renewable energy, electrifying our transportation systems, moving to regenerative farming and carbon sequestering. Gameau calls it "fact-based dreaming" something we can surely all get on board with. Also read: Can documentaries inspire real change? 7 Indian documentaries you can't miss on Netflix
