

Akuo, an independent global renewable energy power producer and developer, has been chosen by the New Caledonian Government to construct and operate an electricity storage facility capable of delivering 50 MW for 3 hours every day throughout its life cycle (12 years). To do this, Akuo is planning to install over 200 MWh of storage capacity.

The H?lio Boulouparis 2 project consists of over 58,000 solar panels with a cumulative peak capacity of 16 MW ??? enough to cover the energy needs of over 21,000 residents of New Caledonia. The plant will also feature a lithium-ion battery storage system with a capacity of nearly 10MW (The hours of storage were not released)..

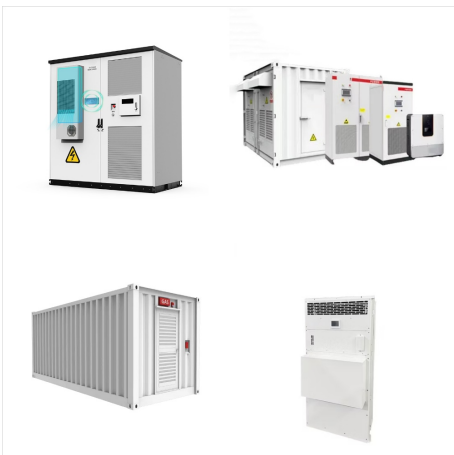

French renewables developer Akuo has won a tender tio build a large-scale battery storage system in New Caledonia, a French overseas territory in the southwestern Pacific Ocean. The giant battery is expected to be the largest storage facility in the region and also in France, with a planned storage capacity of 200 MWh.

NEW CALEDONIA BATTERY STORAGE FOR HOME

The government of New Caledonia, a French overseas territory in Polynesia, has announced plans for a 150MWh battery energy storage system (BESS) to be deployed by IPP Akuo Energy. Authorities have enlisted Akuo, a developer and independent power producer (IPP), to deploy the system which will have a discharge duration of three hours, a state

We are at your side to create, build and maintain solar solutions in New Caledonia and the Pacific. Our proven experience and know-how allow us to offer you high-performance and reliable technologies, designed to last over time. Your project, our commitment: AMBI Energy supports you towards safe and reliable renewable energy.

The government of New Caledonia, a French overseas territory in Polynesia, has given the green light to the construction of a 50-MW/150-MWh battery energy storage system (BESS) by domestic renewable power producer and developer Akuo.

NEW CALEDONIA BATTERY STORAGE FOR HOME

It is not the first grid-scale battery storage project to come online in New Caledonia. Four years ago, Energy-Storage.news reported on the commissioning of a 5MWh system co-located with a solar PV plant, deployed by ???
