The New Zealand energy transition is gathering pace, with the Government recently committing to its Emissions Reduction Plan and a range of support to accelerate the transition to renewables. Energy companies are also more actively pursuing sustainability strategies and investments to support decarbonisation and the transformation of the energy system.

Global renewable energy infrastructure developer, Harmony Energy Limited has entered a joint venture with First Renewables Limited, part of New Zealand energy group Clarus (formerly Firstgas Group

Where our energy comes from. Most of New Zealand's energy is supplied by fossil fuels, including 99% of transport energy, and around 60% of industrial energy. Much of our electricity is generated from renewable energy sources (80-85%), which is promising for reducing our reliance on fossil fuels in the future.

Renewable energy is generated from self-sustaining sources: wind, water, sun and geothermal.

Non-renewables are gas and coal. NZ's grid is about 85% renewable, which is pretty epic. When tech comes to the party, bring on a 100% renewable New Zealand!
