

Kosovo's recent Energy Strategy sets an ambitious vision to achieving a just energy transition for the country between 2022-2031. The main pillar of the Strategy is to accelerate renewable deployment, focused on utility-scale wind and solar PV. Kosovo plans to integrate 1200 MW of RES over the next 10-years. 100 MW Solar Engineering, P

The pace of development for solar projects in Kosovo is increasing. There is growing interest from investors to engage in developing new solar capacities across the country. Currently there are roughly 10 MW generated through small-scale solar energy projects.

Kosovo\* could install 250 MW of solar capacities for self consumption, both in the prosumer and the behind-the-meter category, which will bring investments of around EUR 300 million, said Lorik Haxhiu, local project coordinator for the USAID-funded Kosovo Energy Security of Supply activity.

This is the first large-scale photovoltaic system in Kosovo that can increase the installed capacity of photovoltaic energy from the current 10.1 MW (2022) to up to 110.1 MW. The project contributes to the achievement of these following United Nations Sustainable Development Goals:

Unisolar L.L.C. is the exclusive representative of the company AE SOLAR GMBH, for photovoltaic panels in the Republic of Kosovo and Albania. This made us proud as a company, motivating ???

Despite being geographically well suited for developing solar energy, Kosovo is facing legal, administrative, and financial barriers such as prolonged authorization procedures, solar PV installed capacity limitation, lack of RES skills and capacities, protracted legalization process, lack of public awareness, and modest support schemes, that

This is the first large-scale photovoltaic system in Kosovo that can increase the installed capacity of photovoltaic energy from the current 10.1 MW (2022) to up to 110.1 MW. The project contributes to the achievement of these following ???

The EIB is providing ???33 million for the construction of one of Kosovo's largest solar photovoltaic plants. In line with the EU Global Gateway initiative, the project will also benefit from a ???29 million loan from the KfW Development Bank and a ???32 million EU grant channelled through the Western Balkans Investment Framework

Kosovo\* could install 250 MW of solar capacities for self consumption, both in the prosumer and the behind-the-meter category, which will bring investments of around EUR 300 million, said Lorik Haxhiu, local project ???

Unisolar L.L.C. is the exclusive representative of the company AE SOLAR GMBH, for photovoltaic panels in the Republic of Kosovo and Albania. This made us proud as a company, motivating us to achieving the highest possible successes in the field of renewable energy.

The EIB is providing 33 million for the construction of one of Kosovo's largest solar photovoltaic plants. In line with the EU Global Gateway initiative, the project will also benefit from a 29 million loan from the KfW

To support the green transition in Kosovo\*, one of its largest solar photovoltaic plants will be constructed on former ash dump fields near Pristina with a capacity of up to 100 MW. The electricity sector in Kosovo is almost entirely dependent on coal-fired power plants.

This investment project will install a solar photovoltaic plant of up to 100 MW capacity on former ash dump fields near Kosovo A thermal power plant. This will be the first large-scale solar photovoltaic plant in Kosovo and will increase installed capacities tenfold from 10.1 MW to ???
