

When should a Hawker® battery be replaced?

A Hawker® battery is considered to be at the end of its expected operation life when one or more of the following applies: during an Open Circuit Voltage (OCV) test, a fully-charged battery measures less than 12.65 volts. Then, the battery should be replaced.

What is the difference between a Hawker® battery and a Hawker® batteries?

Hawker® batteries have some differences compared to a standard Hawker® battery. Hawker® batteries use thinner plates (up to twice as many plates than are found in a same-sized flooded-cell battery), and Hawker® battery plates are 99.99% pure lead. More plates equate to more active-material surface area.

When should I recharge a Hawker® battery?

If a Hawker® battery is in a vehicle or other equipment that is not used on a regular basis, recharge it when its Open Circuit Voltage (OCV) drops to no less than 12.65 volts. This is highly recommended to prevent temperature induced failure.

Are Hawker batteries safe?

They are certified non-spillable and meet Department of Transportation DOT hazardous material requirements. Hawker® batteries have a 30-month shelf life and a 36-month warranty backed by superior direct customer support. ©EnerSys 2024.

What is a Hawker flexpak™ thin plate pure lead battery/charger pack?

HAWKER FLEXPAK™ Thin Plate Pure Lead battery/charger packs offer outstanding flexibility and ease of use that will change the way you work. This sealed battery/charger pack can be used when and where you need it most for exceptional performance.

What is the output voltage of a Hawker float/trickle charger?

Under normal conditions, a Hawker float/trickle charger should have an output voltage of between 13.5 to 14.1 VDC when float charging a single nominal 12-volt battery. The optimal constant voltage is 13.62 VDC at 77°F (25°C).

NIUE HAWKER ENERGY BATTERIES

Our Products. At HAWKER (R), we craft custom hybrid motive power solutions for Class I, II, and III trucks to power customer's unique daily operations. We offer the broadest product range in the industry ??? including traditional flooded lead acid, to Thin Plate Pure Lead (TPPL) and lithium batteries, high-frequency modular chargers, and data management tools and accessories - ???

Hawker Cyclon 0800 0004 pure-lead thin plate rechargeable 2v 5 Ah X-cell battery offers numerous advantages, due to its unique, patented starved-electrolyte system. The 2.5Ah, 5.0Ah and 8.0Ah models are all UL 1989 ???
