

What is a Nomad system?

From the 2 MWh Traveler to the 214 kWh Pathfinder, the NOMAD system can meet virtually any application need. Leverage cost savings and control of energy storage without extensive investment in fixed assets. Reduce reliance on vulnerable public grids and power infrastructure to minimize unplanned outages or blackouts.

Who is Nomad transportable power systems?

WATERBURY, Vt., November 03, 2022 -- (BUSINESS WIRE)-- Nomad Transportable Power Systems ("NOMAD"), a company founded by U.S.-based battery manufacturer KORE Power, has sold the industry's first mobile energy storage unit to Green Mountain Power (GMP) in Vermont.

Why should you choose nomad power systems?

NOMAD's power systems can do everything fixed energy storage can do- like boosting reliability and making renewable energy dispatchable - while also providing mobility. They meet any application or project's energy needs by bringing power where and when it's needed most.

How can a military use Nomad?

Deploy temporary EV charging points and eliminate the need for costly fixed storage infrastructure at e-freight or e-transit charging installations. Rapidly deploy NOMAD to support disaster relief efforts and restore power grids. Likewise, defense interests can utilize NOMAD to mitigate energy security concerns at remote bases or outposts.

How does Nomad powerdock work?

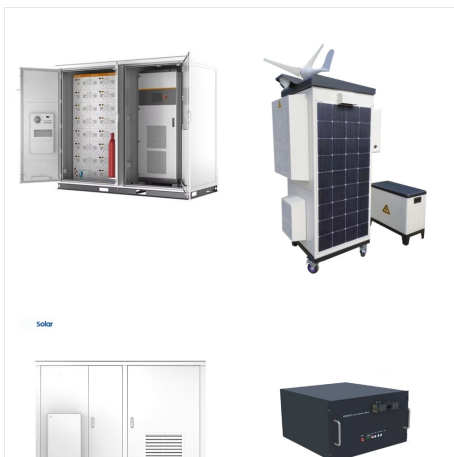

Rapidly respond to changing grid conditions and bolster energy security. Stack fixed and mobile energy storage assets to modernize your energy strategy while retaining the agility of relocating when and where energy support is needed. The Nomad Powerdock system connects you to power in any environment with one seamless integration.
