

How much solar power does a Nomad 200 provide?

The Nomad 200 provides up to 200 watts of solar to keep a Yeti power station charged and everything from laptops to fridges to medical devices running for days on end. Four monocrystalline panels enclosed in a protective case fold down to a compact profile for easy storage. Hanging loops allow you to strap the panel to vehicles, tents, and more.

What is a nomad & how does it work?

Our most portable large solar offering, Nomads fold down to a quarter of their full size, making them ideal for situations where power needs are large and space is limited. The Nomad 200 provides up to 200 watts of solar to keep a Yeti power station charged and everything from laptops to fridges to medical devices running for days on end.

What is the Goal Zero Nomad 20 solar charger?

The Goal Zero Nomad 20 is a solar charger that features our new design, which is durable enough to last through any adventure and sleek enough to fit in any pack or bag. It includes integrated cable storage, a built-in Flip dock, and an adjustable kickstand. The built-in kickstand clicks into place at multiple angles, allowing you to position the panel for optimal solar collection.

What is a 20-watt Nomad solar panel?

The Nomad 20 is a 20-watt foldable solar panel that can charge a wide range of small to medium size devices from the sun. It features our new solar charger design, which is durable enough to last through any adventure and sleek enough to fit in any pack or bag. The Nomad 20 includes integrated cable storage, a built-in Flip dock, and an adjustable kickstand.

What is a Nomad 20 solar panel used for?

The Nomad 20 solar panel is used for recharging various devices. Solar charge times vary and are dependent on many factors such as elevation, temperature, time of year, angle, and position to the sun.
