Ion Obelisk amplifiers Ion Systems made three amplifiers in the "Obelisk" range. They all evolved from the last of the Nytech amplifiers. The CA102 became the Obelisk 1, The CA202 became the Obelisk 2 and the CA302 became the Obelisk 3. The Obelisk 3X was basically an Obelisk 3 with the power supply transformer removed to make room for a

Key learnings: Power System Definition: An electric power system is a network designed to efficiently generate, transmit, and distribute electricity to consumers.; Voltage Regulation: Managing voltage levels through transformers is crucial for minimizing energy loss and ensuring safe, efficient power delivery.; Transmission Importance: High voltage a?|

Harnessing wind power and calculating leverage needed for the pulley system carefully, the obelisk was raised in 25 seconds. Gharib claims that this was most likely how the ancient obelisks were raised as well as how the pyramids and temples of Egypt were built. This claim, however, is entirely speculative as there are no records indicating a
