

That is older gen Hybrid Inverter. Got a local quote for 8 panels, gen3 5kw and newer 9.5kW battery for less than this. Octopus price is around £320 per panel, meaning just the battery/inverter price is something like 3800 for 2.6kwh, 7000 for 5.2kwh and 8400 for the 9.5kwh So all a bit pricey

A 23 MW solar power facility with 8 MWh of battery storage was officially opened in the Gambia. This project is part of the Gambia Power Restoration and Modernization Project (GERMP), which aims to provide ???

Add Octopus Power Pack to your regular tariff. We'll set up your V2G charger to automatically manage your charging and discharging in the greenest way possible, so you can fill up for free. A typical V2G driver could save £880 per ???

Octopus Intelligent specific automations include:
Charging battery overnight and running the house exclusively from battery in the day. All solar is forced exported. This enabled negative bills for October (all heating is electric) and low cost so far in November (?5 so far). (Video)

Octopus Energy Generation has announced a substantial ?2bn investment in UK renewable energy projects by 2030. Skip to site menu Skip to page content. PT. Octopus is also initiating a 12MW battery project in Cheshire, expanding a portfolio that already includes 16 onshore wind farms, three offshore sites, three battery projects, 138 solar

A trial run by Octopus Energy and Powervault in 2020 showed that even without having solar panels on the roof, the average UK customer could save up to ?270-580 per year by using a "Powervault" battery alongside a smart tariff like Octopus Energy's AgileOctopus (which allows you to take advantage of cheaper "off-peak" energy, which

Shop Suction Cup Silen Detachable Fan, Equipped with a Flexible 360° Rotatable Octopus Tripod, 60 Hours Battery Life, Powered by USB for Student Bed Desk Bike Bed Treadmill Camping Trip online at best prices at desertcart - the best international shopping platform in Gambia. An unofficial community to share Octopus Energy news, innovations and money saving offers. One solution is an L2 EV to 3 pin plug adapter, and then running a heater / charging a battery etc from this during test charges. You'd also need an Intelligent compatible charger (Ohme or possibly Zappi - not sure if it's out of beta yet).

Octopus Flux will be able to save customers more than £326 a year compared to the suppliers next more appropriate tariff, it noted. "We're delighted to launch our next generation import/export tariff, "Octopus Flux", for those with solar panels and a battery at their home," an Octopus spokesperson said.

kwh Solar, 10kw battery storage, EV, & Octopus intelligent Go with Export . Not sure if this is the best place to post this, may have to post on /Sunsynk later too. in all the time & have set the charging amps to a lower settings so it's effectively trickle charging whenever Octopus schedules the charge. This means the car

5kWh battery storage For small to medium sized homes, a 5kWh battery is the perfect way to optimise your energy usage and make savings on your energy costs. Installed with both the solar panels and Microinverters mentioned above, as well as everything else you'll need for a standard installation, a mid-sized battery is best for systems with 6

Pairing the right smart home tech with the right smart tariffs can save a lot of money, cut your carbon impact, and help the world ditch fossil fuels faster. Over a million customers have now tried an Octopus smart tariff or service.

A group discussion for users of the Octopus Agile and Go Tariffs. Solar and Battery owners please feel free to discuss how you maximise savings using Agile and Go to maximum efficiency. Solar and

First deal to accelerate growth of renewables developer Exagen and the construction of the UK's largest battery; London, Wednesday 24 August 2022 - Octopus Energy Group today launches its new renewables fund ???

As people have said. Tariff can be the game changer in all this. I was on Octopus Go from install then switched to Flux over the summer and making money. Switched back to Go last month. Would be on Intelligent octopus if car/charger allowed as get more cheap hours as cheaper rate and a better export (fat chance of that in the winter). Other things:

Octopus Energy Generation has announced a substantial ?2bn investment in UK renewable energy projects by 2030. Skip to site menu Skip to page content. PT. Octopus is also initiating a 12MW battery project in ???

I set the battery to charge in the same period as the car will charge to avoid battery drain. For example set the battery to 70% if I know that is what it is usually down to by the time the car starts to charge. The battery will then effectively pause while ???

Octopus and Powervault are over the Moon to be able to announce a groundbreaking smart trial, paving the way for a smarter, greener energy system. Skip to main content. Menu. Powervault's battery models use industry standard demand profiles used by Ofgem to simulate an average domestic customer (PC1). The range ?270 to ?580 is based on

Octopus and Powervault are over the Moon to be able to announce a groundbreaking smart trial, paving the way for a smarter, greener energy system. Skip to main content. Menu. Powervault's battery models ???

I'm currently on the Octopus Go (and considering Octopus Intelligent) for my power due to me having a PHEV on order which I plan to charger overnight. As part of the tariff, my power is currently charged at ?0.05 / kWh vs the standard tariff of ?0.16 / ???

Looking for advice on how flux and the battery settings will work. I understand I can set the battery to charge between 2am and 5am. Octopus Flux - Give energy battery settings. sewingqueen Posts: 25 Forumite. 2 November 2023 at 7:26PM in Energy. Looking for advice on how flux and the battery settings will work.

A community to share Octopus Energy news, innovations and money saving offers. A 5kW battery saving 25p/kWh would save you about ?1/day for maybe 5 months of the year ?1400 to save ?150/year doesn't seem like an incredible investment, you'd take about 11 years just to break even and then you'd get a ~10% return

An unofficial community to share Octopus Energy news, innovations and money saving offers. I've got a 5kwh battery and an inverter that has a max output of 2.5kw from the battery (or 3.6kw from solar panels). This means that come evening, so long as I'm not using the oven, hob and kettle all at the same time, I can survive off the battery

OctopusPeaker battery plan. Earn 23c per kWh for peak export, 10c per kWh for off-peak export & 5c per kWh for night export. Ts & Cs apply. Learn more. Zero Bills by Octopus. Where we guarantee you pay nothing for your electricity usage* for five years. Learn more. Refer a friend. For each friend you bring along, you get \$50 and your friend

This project, with a capacity of 50MWp and 18MWh battery storage, aims to be Gambia's first utility-scale independent power producer (IPP). Upon completion, it is also expected to serve ???
