the ohmmu battery was worth it just for the improved sound. it was like 1`1 pounds which was much lighter than the old lead acid. ive got a 22 model 3 perf now so these cars come with the newer 15v lithium batteries. a Lithium 12v battery pack can be a lot lighter than a lead-acid one. So in that respect, it's definitely an upgrade to swap

I purchased an Ohmmu battery 18 months ago, but returned it after learning of incompatibility with the Tesla Y Is anyone aware of a 12v lithium battery that works consistently in a 2020-2021 MY? Is there still the potential for software issues? Thanks. J. jjrandorin Moderator, Model 3 / Y, Tesla Energy Forums. Moderator. Nov 28, 2018 23,309
