Norfolk Island is transitioning to renewable energy solutions, using solar and batteries to lower the cost of electricity for all residents. As part of this process, every electricity meter must be replaced. In September 2023, we will begin this process in Burnt Pine and will gradually work our way around the island. What will this mean for you???

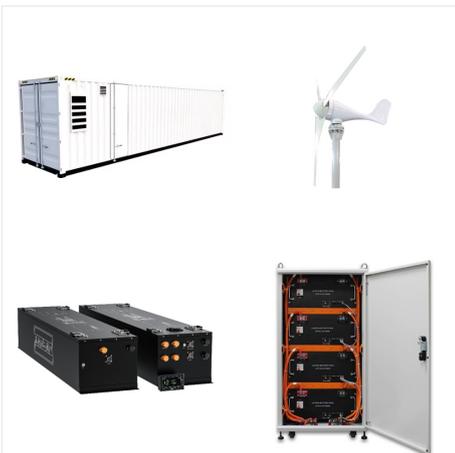

There have been more than 555 small-scale solar power systems installed on Norfolk Island, with a collective capacity of 1,770 kW. That's pretty impressive given its remoteness and a population of 1,849. But this ???
