VIRTUAL POWER PLANT.

Origin solar feed-in tariffs. Origin Energy offers a standard feed-in tariff of between 3.3c/kWh and 10c/kWh to households that export their solar power to the energy grid. But eligible customers can get even more for their solar power by signing up to Origin's "Solar Boost" or "Solar Boost Plus", which include slightly higher FiTs of:

Solar Boost is a good option for those who are not home during the day and tend to use most of their energy in the morning and evenings, and are exporting a lot of their solar energy to the grid. For those who use most of the solar energy they produce in the home with relatively low solar export volumes another plan may be for you.. This is general information only.

In addition to retailing electricity and generating it in mostly coal and gas power stations, Origin is a large installer of rooftop solar systems. The price range displayed is simply the minimum and maximum price that reviewers have reported paying for that size of solar panel system from Origin Energy in the previous 12 months. If we don

We acknowledge the Traditional Owners of the land where we work and live. We pay our respects to Elders past, present and emerging. We celebrate the stories, culture and traditions of Aboriginal and Torres Strait Islander Elders of all communities who also work and live on this land.

Reduce your energy bills. Adding a battery to your solar system can help reduce your electricity bills by lowering your reliance on grid-supplied energy, as you'll be able to draw from your own supply of stored energy. Reduce your carbon footprint. Your battery stores excess solar power your home doesn't need to use right away.
