So now I"m looking for the PACE BMS Password and/or the best/correct PC software to use to make connection thru the RS485 communication board. Z. Zivva New Member. Joined Feb 3, 2022 Messages 123 Location Bali, Indonesia. Jul 26, 2024 #4

It has been suggested here on the forum that some of the cheap Chinese BMS should be derated by 50%. So a 100 amp BMS is really only good for 50 amps. Some BMS will allow a surge over the amp rating, but only for very short periods of time. The 120 amp JBD BMS (aka Overkill Solar) has been proven to run continuously at 120 amps.

PACE BMS is used by Jakiper & Others for their prebuilt battery packs and these have shown good communication & compatibility with Victron etc. They have the RS232/485 & CanBus (works out of box by default) as well as being linkable together. They have limited 8S Versions but are mostly 16S for 48V battery systems.
