Building retrofitting in Palestine can tackle the issue of energy poverty resulting from a shortage of natural resources and the dependence on imported energy. This paper aims to use energy simulation for typical existing residential buildings to assess the energy saving from a proposed retrofitting program.

The simulation results for applying the retrofit plan on two residential building types and three climatic zones in Palestine using design-builder simulation tools show a significant reduction in energy for heating, cooling, lighting, and domestic hot water use.

You can retrofit nearly any large commercial space to accommodate self-storage. Whether you have a single-story building or a high-rise building, our team can help you determine what modifications need to be made to suit a self-storage facility. Storage Building Company has extensive experience constructing all types of self-storage facilities.

Our self storage Palestine facility features high-tech security, giving you peace of mind that your belongings are safe and secure. We employ 24/7 video monitoring, motion alarms, lock checks, electronic gate access with code entry, and well-lit hallways to ensure superior safety.

Building retrofitting in Palestine can tackle the issue of energy poverty resulting from a shortage of natural resources and the dependence on imported energy. This paper aims to use energy simulation for typical existing residential buildings to assess the energy saving from a proposed retrofitting program.
