

What's a use-case for energy puller modules? It's easy to pipe energy into a router via pretty much any mod which handles energy. Will consider a direction toggle for the distributor. Guess it makes sense, given the item distributor can do it.

The router with the blue and orange lines is pulling the items out and putting them in a sophisticated storage barrel with stack upgrades. Refined storage external storage connection ???

Welcome to Modular Routers! This is a flexible mod for moving items around in numerous ways. With a single block - the Item Router - and one or more plug-in modules, you can pull items from an inventory (including modded inventories like Storage Drawers), send them to other inventories near & far, place items as blocks, break blocks, drop items

PANAMA MODULAR ROUTERS ENERGY DISTRIBUTOR

(Distributor Module), (Modular
Routers), MOD, Minecraft() MOD() MOD???

Welcome to Modular Routers! This is a highly flexible mod for moving items around the world in various ways. With a single block - the Item Router - and a selection of plug-in module items, you can: pull items from an inventory (including modded inventories like Storage Drawers) send them to other inventories near & far; place items as blocks

I love the modular Routers Energy Distr. module, it works on most things, but ran into a bump in the road. I am trying to use it with Thermal machines, like the pulverizer and instead of getting ???

PANAMA MODULAR ROUTERS ENERGY DISTRIBUTOR

What's a use-case for energy puller modules? It's easy to pipe energy into a router via pretty much any mod which handles energy. Will consider a direction toggle for the distributor. Guess ???

I love the modular Routers Energy Distr. module, it works on most things, but ran into a bump in the road. I am trying to use it with Thermal machines, like the pulverizer and instead of getting 1k a tick, it gets 20rf/t. I've pulled it off other machines, and still 20tf/t. I slapped energy 6 upgrades on it and still nothing.

The router with the blue and orange lines is pulling the items out and putting them in a sophisticated storage barrel with stack upgrades. Refined storage external storage connection is under the barrel

PANAMA MODULAR ROUTERS ENERGY DISTRIBUTOR

Modular Router to Distribute Power. By putting an Energy Upgrade on a router, we can turn it into a battery. There are further upgrades that can allow it to hold more power and distribute it at faster rates. The energy distributor doesn't have any internal configuration,,,

The fastest option would be to put a puller module and a placer module in a wall of modular routers however big your hammer is. Have the puller module in each router connected to a single inventory(chest) with the filtered exporters connected to it.
