

How much do Panasonic solar panels cost?

Panasonic's solar panels range in efficiency from 19.2% to 22.2%, and they have 25-year workmanship and performance warranties. Panasonic solar panels cost between \$2.61 and \$3.45 per watt on the EnergySage Marketplace - that's \$15,660 to \$20,700 for a 6 kW system before the federal solar tax credit.

How efficient are Panasonic solar panels?

While most solar panels fall in the 14% to 18% range, Panasonic panel efficiency ranges from 19.2% to 22.2%. For comparison, the most efficient panel on the EnergySage Marketplace is SunPower, at 22.8% efficiency, putting Panasonic panels among the best solar panels available when it comes to efficiency.

Does Panasonic still make solar panels?

When Panasonic shifted its solar panel production into the hands of original equipment manufacturers (OEMs) a few years ago, it seemed the company was backing away from the solar power market. But Panasonic was merely sharpening its focus on the design of panels and other residential energy products.

How much does a Panasonic solar panel cost?

The average cost of Panasonic solar panels is \$2.75 per watt. LG Solar and REC have similar prices, with costs of \$2.75 and \$2.76 per watt, respectively.

Are Panasonic solar panels a good investment?

Although it's a hefty investment, the long-term warranties that back up most of Panasonic panels and their panel ratings--92% over 25 years--should give homeowners peace of mind that they've chosen well. Find a network of trusted installers for solar system, solar panels and electricity needs.

Can you finance a solar system with Panasonic?

Homeowners looking to make the switch to solar with Panasonic can finance their new home energy systems with solar loans and leases. Customers can learn more specific information about these and other financing options through the professional installer from whom they purchase the panels. Who Installs Panasonic Solar Panels?
