

Increase value, control, and security across your assets" entire life cycle with Hitachi Energy Grid Automation Services. Building on our dedicated service agreements, our suite of advanced services empower you with new levels of integration, support, and close collaboration???from installation and commissioning to upgrades, repairs, maintenance, and replacement.

Easy-to-use asset data: Grid Automation Shield presents up-to-date information via a user-friendly portal with intuitive data representation for easy understanding. Precise asset life cycle information: Asset status, history, condition, and location are available to Silver and Gold customers. Access to experts: A network of Collaborative Operations Centers offers local ???

Improve smart grid reliability and security with power generation, transmission & distribution products and power automation solutions. Advanced metering infrastructure CBC-8000 capacitor bank control and GridAdvisor Insight optical sensor

SICAM 8 - Power automation platform for automation, control, monitoring and diagnostics  
Further Software for automation, operation, visualization & diagnostics  
More hardware & engineering tools  
Tools for (communications) diagnostics  
Bay controller  
Short Circuit Indicator  
Distribution Automation

These grid automation relays are designed for remote control and monitoring, protection, fault indication, power quality analyzing and automation in medium-voltage secondary distribution systems. With RER615, grid reliability is enhanced, ranging from basic, non-directional overload protection to extended protection functionality with power

- Paraguay receives a US\$250 loan to improve its power grid. View all news, Paraguay Total Energy Consumption. In 2022, per capita energy consumption stood at 1 toe, 20% lower than the average for South America. Since then, oil products are entirely imported (2.5 Mt in 2022). Interactive Chart Paraguay Crude Oil Production.

Ingeteam offers a wide range of products and solutions with the latest technology for the comprehensive control, protection and automation of electrical substations. Based on microprocessor technology, the solutions proposed by Ingeteam offer a custom-made system complying with all of the requirements of the plant operational staff.

Ingeteam offers a wide range of products and solutions with the latest technology for electrical distribution grids, within the context of developing smart grids.. The products developed by Ingeteam in this area are designed to facilitate and control electrical services optimally, guaranteeing energy supply to end users in different urban or rural areas.

ABB is a global technology leader in electrification and automation, enabling a more sustainable and resource-efficient future. By connecting its engineering and digitalization expertise, ABB helps industries run at high performance, while becoming more efficient, productive and sustainable so they outperform.
