On Nov. 28, 2023- Researchers at the Pusan National University, South Korea, proposed a simple methodology to transform existing PV systems into photovoltaic-thermal (PVT) arrays. These scientists developed a hybrid rooftop photovoltaic-thermal system that can also be installed as a retrofit solution where a PV system is already operating.

As more engineers work on photovoltaic solutions, our B-G474E-DPOW1 Discovery kit, with its STM32G474, can help them design better solar inverters. Just like the STM32F334, this MCU integrates high-resolution timers to offer tighter voltage regulations. Photovoltaic systems harness solar power and convert it into usable electrical energy.
