

Solar energy: Lorentz solar pool & well pumps; Residential/Commercial solar systems off grid, hybrid or grid tie systems; From our base in Colebay, we have provided solar services in and around St Maarten and St Martin since 1992, whilst supplying solar parts and ???

With our headquarters strategically located in French and Dutch St. Martin, we cater to the solar PV panel needs of the entire French and Dutch Caribbean region, including Sint Maarten SXM (Netherlands Antilles), Anguilla AXA, Guadeloupe, Martinique, Trinidad & Tobago T& T, Grenada and Antigua & Barbuda.

As the world grapples with the challenges of climate change, this tropical paradise is harnessing the power of the sun to transform its energy landscape. In this blog post, we will explore the untapped potential of solar energy on the island and how it is playing a pivotal role in shaping a sustainable future.

PHOTOVOLTAIC SOLAR SYSTEM SINT MAARTEN

At Solar Energy Caribbean, we specialize in providing Grid-tied and Off-Grid solar PV systems with battery storage, ensuring that homes and businesses in Sint Maarten never have to face such disruptions again.

Solar Energy Caribbean offers reliable solar power solutions across the Dutch & French Caribbean, including Sint Maarten, Saint Martin, Saint Barthélemy, Saba, and Trinidad & Tobago.

Energynautics and TNO reached similar conclusions regarding the viability of solar photovoltaic (PV) installations as the best renewable energy option for St. Maarten. Both reports strongly advocate for the rapid scaling-up of solar PV projects as a cost-effective and sustainable solution.

PHOTOVOLTAIC SOLAR SYSTEM SINT MAARTEN

At Solar Tech Caribbean, we are dedicated to revolutionizing the way you power your life. Our mission is to provide cutting-edge solar solutions, seamless Starlink installations, and convenient EV charging services tailored to meet the unique needs of Sint Maarten/Saint Martin. Explore a greener, more connected, and energy-efficient future with us!

Solar photovoltaic (PV) emerges as the cornerstone of St. Maarten's energy future, enabling St Maarten to move from a predominantly diesel-based generation to 23 % RE share by 2034 (in the enhanced PV scenario). Energynautics advocates for the rapid deployment of solar PV systems, starting with tenders for public buildings and carports.
