

Who generates electricity in Cameroon?

Presently, Electricity is generated by independent power producers (IPPs) and Energy of Cameroon (ENEO) (the latter also doubling as the sole distributor), to consumers over a transmission network managed by National Electricity Transmission Company (SONATREL).

What are the operational characteristics of current power plants in Cameroon?

Operational characteristics of current power plants in Cameroon. The system load curve, modelled in LEAP as energy load shape, was obtained from the sole national electricity distributor ENEO. In this study, dispatch is by merit according to current practices in Cameroon's generation system.

How big is Cameroon's energy demand?

From the results, it is observed that the generation capacity would reach 10.52 GW under the REF scenario, indicating a growth of over 800% between 2016 and 2045, and Cameroon's high future demand. Despite the nation's energy diversification and security initiatives, large hydropower continues to be a major contributor under all four scenarios.

Should Cameroon increase its electricity generation capacity?

These scenarios explore policy options and the economic costs of increasing the country's electricity generation requirements and reducing GHG emissions. Cameroon will require an eight-fold increase in its generation capacity between 2014 and 2045 to meet the 20% reserve margin target and general electricity requirements.

Why is Cameroon not a coal producer?

Cameroon is not a coal producer, and given the need to reduce emissions and ensure energy security, it is not considered a generation option. Likewise, nuclear was not considered due to the relatively long lead time, immense capital costs and very high associated operational risks.

What factors affect Cameroon's energy system?

The second step entails listing essential factors that influence decision-making in the energy system. In addition to the economic, social and environmental factors, political and technological factors also affect Cameroon's energy system.
