

Pixii is proud to launch Pixii Home, a game-changer in residential energy solutions. Building on our expertise on delivering battery energy storage systems for the industrial sector, we are now bringing our ???

Polarium and Pixii have signed a Memorandum of Understanding (MoU) to jointly develop and market energy storage solutions including Polarium lithium batteries and Pixii inverters and related equipment.

Flexible off-grid/on-grid battery energy storage system. The Pixii PowerShaper XD, is a fully integrated IP55 modular energy storage system designed for easy deployment, high energy density, low noise stand alone or grid connected power. Utilising Pixii ???

Virtual power plant platform provider Fusebox together with modular energy storage system manufacturer Pixii have successfully launched the first integrated battery system to participate ???

Estonian start-up FuseBox and Norwegian company Pixii started cooperation to develop and combine energy storage systems with demand response. The project enables real-time communication between electricity consumers, ???

Polarium and Pixii have signed a Memorandum of Understanding (MoU) to jointly develop and market energy storage solutions including Polarium lithium batteries and Pixii inverters and related equipment.

By storing excess energy, especially from solar panels or during times of low electricity usage, Pixii Home can reduce your need to buy electricity from the grid during periods of higher demand. This can reduce your electricity costs in the ???

Estonian start-up FuseBox and Norwegian company Pixii started cooperation to develop and combine energy storage systems with demand response. The project enables real-time communication between electricity consumers, energy storage and energy systems to maximize the use of renewables and solve the issues related to variable generation.

Pixii recognizes the pressing need for sustainability and provides modular and scalable battery energy storage systems (BESS) that contribute to a greener future. These systems, ranging from a few kW to MWs, are applied in various markets, including EV charging, distribution system operators (DSOs), and residential and commercial applications.

Pixii is proud to launch Pixii Home, a game-changer in residential energy solutions. Building on our expertise on delivering battery energy storage systems for the industrial sector, we are now bringing our cutting-edge technology to the residential market, accelerating the green energy transition.

Virtual power plant platform provider Fusebox together with modular energy storage system manufacturer Pixii have successfully launched the first integrated battery system to participate in the electricity balancing market.

By storing excess energy, especially from solar panels or during times of low electricity usage, Pixii Home can reduce your need to buy electricity from the grid during periods of higher demand. This can reduce your electricity costs in the long run.

Virtual power plant platform provider Fusebox together with modular energy storage system manufacturer Pixii have successfully launched the first integrated battery system to participate in the electricity balancing market.
