

Reliable On-Grid String Inverter. Polycab single-phase solar inverter is a highly flexible and durable device that boasts a transformerless compact design. The device was crafted with world-class components with over 20 years of design life. The inverter is equipped with remote monitoring facility that allows the user to track system performance.

The document describes a series of solar grid-tie string inverters ranging from 80kW to 110kW. The inverters feature high maximum efficiency of 98.7%, wide input voltage range, integrated DC and AC disconnect switches, and monitoring interfaces. They provide string level monitoring and support connection of multiple inverters in parallel up to over 6MW.
