Home standby generators are the most powerful. They can detect outages automatically and provide enough electricity for an entire home with minimal interruption during a power outage. Another generator type is a backup generator. These generators require manual startup, and their wattage is enough to power some appliances.

POWER BACKUP FOR HOME NEAR ME

An automatic backup generator is a back up electrical system that operates whether you are home or away. Within seconds of an outage, it automatically supplies power directly to your home's electrical circuit breaker box. After utility power returns, the generator shuts itself off and waits for the next outage.

With a properly sized whole-house generator, you could theoretically power your entire home. Value: It's an investment that proves its worth every time the power goes out and can increase the resale value of your home. Clean Power: It provides the cleanest power possible for sensitive electronics found in today's homes.
