

APC is a CDW partner that sells some of the best UPS battery backups for home and small business. Be sure to read our guide comparing a surge protector, power strip and UPS if you'd like to learn more about the differences between these device types. Shop All APC UPS Battery Backups

Why is a UPS battery backup important?

It's not just a glorified power bank, because the UPS detects interruptions in the power and automatically switches the connected devices to running off the UPS battery, so they don't shut down. This makes a UPS battery backup especially valuable for computers, preventing work from being lost or files from being corrupted by an improper shut-down.

What is a consumer-grade UPS backup device?

Consumer-grade UPS backup devices are typically classified as "standby UPS power." This means the UPS plugs into an electrical outlet, using power to keep its backup battery constantly charged. It also supplies a PC or other electronic devices plugged into the UPS with AC power via that wall outlet.

Can a UPS battery backup cause a power outage?

In other words, if you experience a power outage in your area, your machinery should not shut downif it is plugged into a UPS battery backup. Many models of uninterruptible power supply USP also provide surge protection. A surge protectorblocks spikes in voltage so that they do not harm your electronics.
