

When I bought my VTX1800C, I purchased some hard krome pipes and a power commander III. The shop put the power commander on without a map, the bike ran a bit on the lean side with a lot of popping going on. I got a map that most closely matched my modifications, and the performance greatly increased. I never had driven the bike without the

POWER COMMANDER FUEL MANAGEMENT SYSTEM

Hence, the clear and prominent "race use only" warnings on the packaging of products like exhaust systems and fuel controllers. Also, installing a Power Commander or flashing the ECU may void your factory warranty since ???

Power Commander II verses Yosh Advanced Fuel Management System. Michael Phillips rode a Hayabusa Gold/Silver. Lowered Yosh full system (stainless). Remapped with the Yosh box. Consistent 9.50's and a few high 9.40's. Installed the power commander and the bike went 9.40's every pass with a 9.30's pass every now and then.

Power Commander 6 (PC6) Upgrades. The Power Commander 6 offers various upgrades over the PCV. While maintaining the core function of fuel tuning, the PC6 introduces limitations to the fueling adjustment range in response to EPA standards, with a capped range at +/- 15% from the base map provided by Dynojet. This model continues to advance the ???

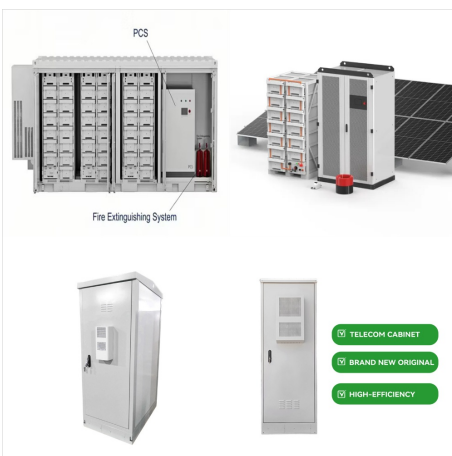

POWER COMMANDER FUEL MANAGEMENT SYSTEM
