

How does Power Africa support Ethiopian Electric Utility?

Power Africa's ongoing support to the Ethiopian Electric Utility is improving operations and boosting the utility's financial well-being, which enhances the reliable supply of electricity to essential health care facilities. EEU staff are inspected at the West Addis Ababa Substation, Ethiopia, as part of this training.

How much power does Ethiopia currently have?

Ethiopia currently has 5,200 MW of installed generation capacity, which reaches less than 60% of the country's population. The GOE plans to increase power generation capacity to 17,000 MW in 10 years, but electricity demand may still outstrip supply due to continued economic development and population growth. Does Ethiopia export power to Kenya?

Ethiopia has a Power Purchase Agreement (PPA) to export up to 400 MW of power to Kenya through EEP. In May 2022, Ethiopia signed a Memorandum of Understanding (MoU) with South Sudan to export 100 MW of power over the next three years.

The Government of Ethiopia, under its latest Growth and Transformation Plan (GTP), envisions transitioning from a developing country to a middle-income country by 2025. Ethiopia's ability to achieve this ambitious goal in such key sectors as agriculture and industry is significantly constrained by current challenges in the power sector. Although Ethiopia is endowed with ???
