This attachment is compatible exclusively with our Monster Series Power Racks, and comes with adjustable components for set-up on a 90", 100", the new Rogue Monster Slinger??? is a rack-mounted cable-pulley system designed to deliver the same training benefits of a traditional Lat Pulldown Machine with better space and cost efficiency.

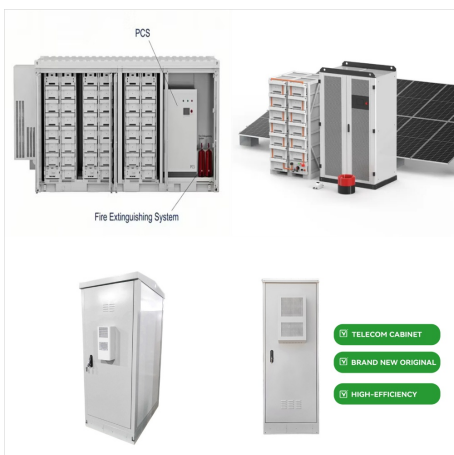

Attaches to the front of your rack for all types of cable work from both top and bottom pulleys. Fits the 84.5" Light Commercial & Residential Rack. A durable build and 160lb capacity offer smooth reps, even when fully loaded. Each side boasts a fixed upper and lower pulley so you can curl, cross, and become a cable connoisseur.

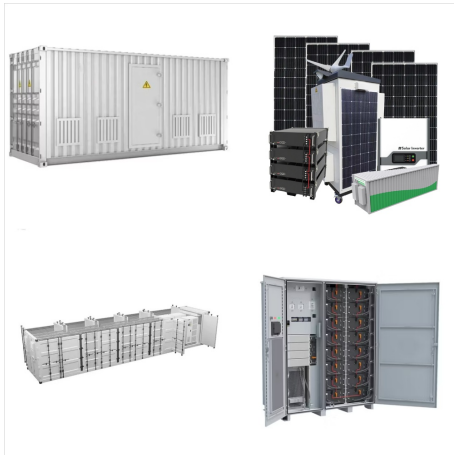

A power rack with cable crossover is a versatile, heavy-duty piece of gym equipment designed for multiple weight-lifting exercises, such as squat rack exercises, bench presses, pull-ups, and lat pulldown exercises.. The cable crossover system adds more variety to your workouts, allowing you to perform cable crossovers, lat pulldowns, and more.

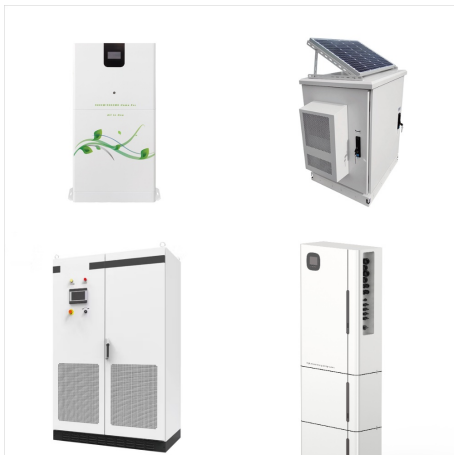

Base unit combines an entire gym into a single power rack footprint, including a power cage, adjustable cable crossover system, pull up, dip handles, landmine and band pegs. Quality Construction The MIKOL-K3 uses heavy-duty 2" x3" square laser-cut steel uprights, enabling higher weight capacity.

You want to use a power rack, functional trainer, and Smith machine; You want dual integrated 221lb Weight Stacks; You want to place it anywhere in your space, even a corner; You want a 2:1 ratio cable pulley system for controlled resistance; ???

The Force USA MyRack is the first customizable modular power rack that offers a monolift, lat pulldown seat with a knee holder and globe grip chin-up bar for improving grip strength.. With a MyRack, your training options are endless, with over 20 attachments, including chin-up bars, J-hooks, safeties, cable crossovers, and cable attachments for hundreds of configurations.

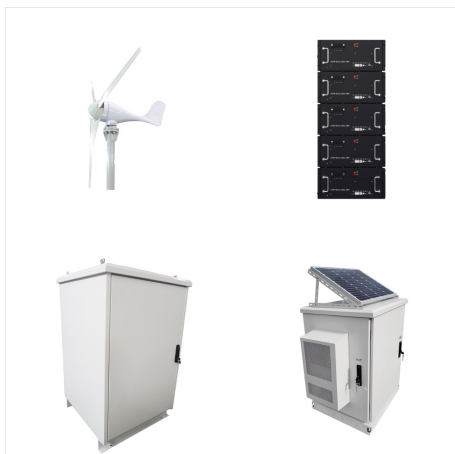

Positioned on either side of a power rack, a cable crossover attachment is a dual pulley system ideal for cable crossovers (chest flies) and delt raises. These are definitely more space-consuming than a single pulley station and are arguably less versatile depending on the brand and weight capacities.
