Customers highly value the exceptional sound quality, portability, and Bluetooth connectivity of the High Power Audio System with Bluetooth. Many customers rave about the amazing sound experience, ease of use, and convenience of taking their music anywhere. The CD player and karaoke features add to the versatility and entertainment value of the

The approximately logarithmic relationship between power and perceived loudness is an important factor in audio system design. Both amplifier power and speaker sensitivity affect the maximum realizable loudness. Sensitivity is typically measured either suspended in an anechoic chamber in "free space" (for full range speakers), or with the

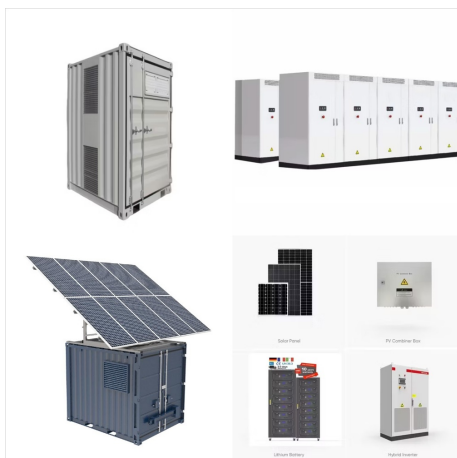

Connect up to 50 compatible high-power audio systems and synchronize the music and lighting. Be sure to download the Sony Music Center app to control your music and sound settings, & the Fiestable app to take charge of karaoke and speaker lighting features to give your party a boost. Sound power or acoustic power is the rate at which sound energy is emitted, reflected, transmitted or received, per unit time. [1] It is defined [2] as "through a surface, the product of the sound pressure, and the component of the particle velocity, at a point on the surface in the direction normal to the surface, integrated over that surface." The SI unit of sound power is the watt ???
