

What is an example of a power system?

Some good examples of power systems include Nen in the anime Hunter x Hunter, Chakra in the anime Naruto, Cursed Energy in Jujutsu Kaisen, Spells in Harry Potter, and Magic in The Lord of the Rings. Whether you're writing a comic, anime, novel, film, or whatever, the steps for creating a well-balanced power system are the same.

What does the power system want?

For instance, heat in our universe wants equilibrium. Gravity moves toward the greatest source. Defining a direction for your system might help. The Power System wants a logical explanation as to how these superhumans output their power and control/increase the latter. Maybe it drains something else?

What is the best power system?

In both cases, the lesson to be learned here is that the best power system is the one that is best at communicating things, but especially characterization, to the audience. At this point it should also be mentioned that both JoJo's and HXH are manga/anime.

Is it possible to have a unique power system?

It's possible to have a unique power system. The uniqueness might not come from what the power system is, but from how it's used, the limitations, and other pieces of the puzzle. If you want to be unique with the type of power system, you have to think out of the box.

Is there magic in power system development?

In the case of this project above, we know there's no magic involved in this world but there is science. Our vision is human fighters whose strength are amplified by scientific solutions. Power system development is like making breakfast. Now that we have the separate ingredients it's time to put them together.

Can a power system have no rules?

It's important to point out that in making a power system, having no rules at all can also be the rule. This method is tricky but doable. Many fantasy stories based on magical power systems have no rules. Whoever has power can do anything, anytime, and that in itself is a rule. This is the million-dollar question most people
