The electricity distributed in Cambodia is partly generated within the country and partly imported. For many years, local generation was on a relatively small scale, and was mostly from diesel and oil generators, while imported electricity from neighboring countries accounted for most of the supply. There was little distribution outside the main urban areas.

From concept to completion, we handle all aspects of fluid power and motion control systems, including: Design and Engineering; Integration and Installation; Manufacturing and Fabrication; Ongoing Support and Maintenance

As rehabilitation of Cambodia's sole existing hydro power station, the 12MW Kirirom I, formally begins, the country has announced firm plans for a further 353MW, spread over three projects by 2016. The projects are embedded in a US\$1355.8M World Bank and Asian Development Bank backed power system development plan, US\$ 992.3M of which will

The system is scheduled to commence in November of this year with an expected completion and COD date in December of next year. This project marks a milestone in Cambodia's RE power section not only in terms ???

The China Electric Power Technology Import & Export Corporation (CETIC) has signed a US\$26M contract with Cambodia's Ministry of Industry, Mines and Energy (MIME) to rehabilitate the Kirirom 1 hydro project. The 10MW plant which lies 110km southwest of Phnom Penh, was originally commissioned in 1968.

Cambodia is set to start building almost 1 GW of new coal-fired power capacity after its government approved two projects. The country's Council of Ministers has given permission for the construction of two power plants and one transmission line worth \$1.7 billion.

At Power Systems International, we offer a wide range of products which have wide practical uses. We specifically produce and sell: Frequency converters (50Hz to 60Hz), Aerospace/ Aircraft ground power units (400Hz & 28v DC), ???
