On the remote island of Malekula, the second-largest island in Vanuatu, a new solar micro-grid is changing the lives of over 2,800 people -- boosting local development while contributing to Vanuatu's sector specific target of transitioning to close to 100 percent renewable energy for electricity by 2030.

The PowerWorks Education Centre features artefacts from coal mines and power stations in the Latrobe Valley ??? including a giant bucket from a coal dredger. The Centre tells the story of the development of power generation in the valley. PowerWorks overlooks the former Hazelwood brown coal mine. The Centre was opened in 1994 as a refurbishment

Idaho Winds LLC, an affiliate of the PowerWorks Group, delivers energy from 14 GE 1.6 MW wind turbines to the Idaho Power Company, under a 20-year power purchase agreement. The renewable energy credits (RECs) generated from the wind farm have been sold to a third party. PowerWorks performs the operations and maintenance (O&M) and asset management.

5 ? Project owner NZT Power Ltd., made up of energy giants bp and Equinor, each with a 45% share. and TotalEnergies with 10%, said it recently reached financial close on the project with work to start

Vanuatu: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. Nuclear power ??? alongside renewables ??? is a low-carbon source of electricity. For a number of countries, it makes up a large share of electricity production. Cite this work.
