

Solar-powered batteries are the key to a future without electricity grids for Polynesian countries in the Pacific (Samoa, Cook Islands and Tonga), a study has found. The study is funded by the New Zealand Institute for Pacific Research (NZIPR) to assess the feasibility of a low-cost, energy future ??? titled "Polynesian pathways to a future

New solar plus battery projects in the Cook Islands demonstrate how off-grid regions can escape reliance on diesel generators. Six of the twelve inhabited Cook Islands are the target of hybrid renewable energy projects comprising solar and solar battery technology. The first of these, on Mitiaro Island, is now complete and should be able to supply all the power needs of the island.
