How does it work? A solar inverter is really a converter, though the rules of physics say otherwise. A solar power inverter converts or inverts the direct current (DC) energy produced by a solar panel into alternating current (AC) energy that can be used to power your home or business.

Fortuner Protonix's solar inverters are meticulously designed to maximize solar energy utilization. By converting DC power from solar panels into AC power suitable for homes and businesses, these inverters incorporate advanced features such as MPPT (Maximum Power Point Tracking) technology. This ensures they operate at peak efficiency even in
